

TECHNICAL DATA SHEET

(applies to double-sided film adhesive tape)

Applications

For bonding lead foil, advertising elements (banners, POS displays), mounting profiles and industrial components, assembling LED screens and touch panels, as well as printing and graphic works.

Available widths and lengths

- Tape width: from 4 mm to 1060 mm (standard width: 1060 mm)
- Roll length: 5 m, 10 m, 25 m, 50 m (standard length: 25 m)
- Custom widths and lengths available upon individual customer request

Technical properties

Type	Double-sided film tape
Color	Transparent
Liner color	Red
Carrier	PET film (polyester, transparent)
Liner	PP film
Adhesive	Strong double-sided acrylic dispersion adhesive
Adhesion	15 N / 25 mm
Shear strength	≥ 48 h
Operating temperature	from -20°C to +120°C
Temperature resistance	up to 200°C (short-term)
Features	High adhesion to lead foil, metal, glass, plastics, and paper; durable, clean, and aesthetic bonding; easy application without the use of tools

TECHNICAL DATA SHEET

(applies to double-sided film adhesive tape)

Installation Instructions (Summary)

- Clean and degrease the surface
- Remove part of the liner and apply the tape, pressing it evenly
- Remove the remaining liner and press the bond firmly to the target surface
- For best adhesion, press for several seconds and avoid mechanical stress during the first few hours after application.

Summary

The double-sided film adhesive tape is a universal mounting solution that combines aesthetic appearance (transparent carrier) with durability and temperature resistance, making it suitable for industrial applications and radiological protection (e.g., for mounting lead foil).

Example of PET tape application: [installation guide available here](#)
